Cost Breakdown

Estimated annual savings with OrderPilot

€83.861

Where your money goes

1. Direct Labor Costs

{{laborCost}}

The time your staff spends manually entering, verifying, and routing purchase orders.

MONTHLY VOLUME

225 POs

TIME PER PO

18 minutes

STAFF COST

€42/hour

Calculation: 225 POs × 18 min × €42/hr × 12 months = {{laborCost}}/year

2. Processing Delays

{{delayCost}}

Lost early payment discounts and delayed fulfillment due to slow PO processing.

AVG INVOICE VALUE

€2,500

DISCOUNT RATE

2%

DELAY FACTOR

{{delayFactor}}%

Based on missed early-payment terms and processing bottlenecks.

3. Rework & Escalation

{{reworkCost}}

Orders that need to be re-processed, corrected, or escalated to management.

REWORK RATE

25%

ESCALATION RATE

10%

MANAGER COST

€62/hour

4. Error Correction

{{errorCost}}

The cost of finding, investigating, and fixing data entry errors.

MONTHLY ERRORS

{{monthlyErrors}}

RESOLUTION TIME

20 min each

ANNUAL ERROR COST

{{errorCost}}

How you compare

Your performance benchmarked against industry averages and top-performing organizations.

METRIC	YOUR COMPANY	INDUSTRY AVG	TOP PERFORMERS
Cost per PO	{{costPerPO}}	€26.40	€5–8
Processing time	18 min	15 min	< 1 min
Error rate	12%	10–15%	< 1%
Automation level	{{automationLevel}}	Partial	95%+
Annual cost	€99.846	€{{industryAvgCost}}	€{{topPerformerCost}}

OrderPilot pays for itself in under {{paybackMonths}} months based on your processing volume.

From manual to automated in 90 days

A proven 3-phase implementation plan tailored to your 225 POs/month.

1

Connect DAYS 1-14

Connect OrderPilot to your ERP and email systems. Start processing your first POs automatically.

- ☐ ERP integration setup (Business Central)
- ☐ Email forwarding configuration
- ☐ Initial PO template mapping
- ☐ Test batch with 10 real purchase orders
- ☐ Validation rules and exception handling

2

Process DAYS 15-45

Ramp up to full volume. AI learns your specific PO formats and supplier patterns.

- ☐ Gradual volume increase (25% → 50% → 100%)
- ☐ AI accuracy tuning on your PO formats
- ☐ Exception workflow setup with your team
- ☐ Staff training on review dashboard
- ☐ Performance monitoring and reporting

3

Scale DAYS 46-90

Full automation. Your team focuses on exceptions only. Continuous improvement kicks in.

- ☐ 100% PO volume running through OrderPilot
- ☐ Automated supplier communication
- ☐ Advanced analytics and cost tracking
- ☐ Quarterly review cadence established
- ☐ ROI measurement against this report

Get started

Most customers go live within 2 weeks. No upfront costs, no long contracts.

Methodology Note

This analysis uses industry-standard cost modeling based on your reported data: 225 POs/month, 18 minutes per PO, 12% error rate. Staff costs are benchmarked at €42/hour (operations) and €62/hour (management). Industry averages sourced from APQC, Ardent Partners, and PayStream Advisors procurement benchmarking reports. Actual results may vary based on PO complexity, supplier diversity, and ERP configuration.
