

CONFIDENTIAL REPORT

PO Processing Cost Analysis

A personalized breakdown of your purchase order processing costs, benchmarked against industry standards.

Prepared for **RB2 Fixed Test**

29 March 2026

HIGH PRIORITY Based on 200 POs/month · 10% error rate

Your PO processing costs you

€79.080

per year · that's **€33** per purchase order

DIRECT LABOR

€26.880

34% of total

PROCESSING DELAYS

€38.400

49% of total

REWORK & ESCALATION

€10.440

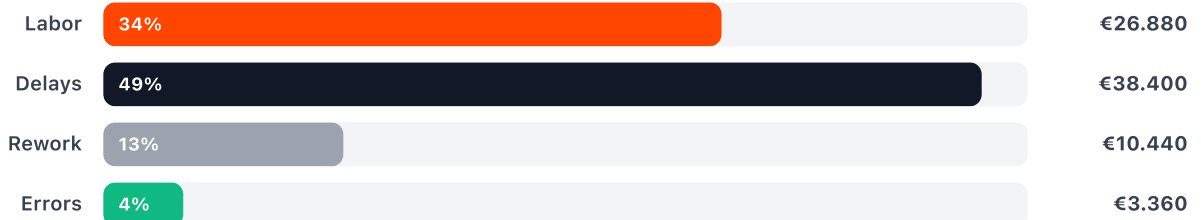

13% of total

ERROR CORRECTION

€3.360

4% of total

Cost Breakdown

Estimated annual savings with OrderPilot

€65.172

Where your money goes

1. Direct Labor Costs

€26.880

The time your staff spends manually entering, verifying, and routing purchase orders.

MONTHLY VOLUME

200 POs

TIME PER PO

16 minutes

STAFF COST

€42/hour

Calculation: 200 POs x 16 min x €42/hr x 12 months = €26.880/year

2. Processing Delays

€38.400

Lost early payment discounts and delayed fulfillment due to slow PO processing.

AVG INVOICE VALUE

€2,500

DISCOUNT RATE

2%

DELAY FACTOR

32%

Based on missed early-payment terms and processing bottlenecks.

3. Rework & Escalation

€10.440

Orders that need to be re-processed, corrected, or escalated to management.

REWORK RATE

25%

ESCALATION RATE

10%

MANAGER COST

€62/hour

4. Error Correction

€3.360

The cost of finding, investigating, and fixing data entry errors.

MONTHLY ERRORS

20

RESOLUTION TIME

20 min each

ANNUAL ERROR COST

€3.360

How you compare

Your performance benchmarked against industry averages and top-performing organizations.

Metric	Your Company	Industry Avg	Top Performers
Cost per PO	€33	€26.40	€5–8
Processing time	16 min	15 min	< 1 min
Error rate	10%	10–15%	< 1%
Automation level	Manual	Partial	95%+
Annual cost	€79.080	€63.360	€15.600

Your Position

ERP Insight: SAP

Organizations using SAP typically see a 40-60% reduction in PO processing time after implementing AI automation alongside their SAP modules. OrderPilot integrates directly with SAP, enabling automated data flow without middleware or custom development.

YOUR EFFICIENCY SCORE

49/100

Based on cost, speed, and accuracy metrics

IMPROVEMENT POTENTIAL

90%

Reduction in processing costs possible

Your return on investment

What happens when you automate PO processing with OrderPilot.

Savings Stack

CATEGORY	CURRENT COST	WITH ORDERPILOT	SAVINGS
Direct labor	€26.880	€2.688	€24.192
Processing delays	€38.400	€3.840	€34.560
Rework & escalation	€10.440	€1.044	€9.396
Error correction	€3.360	€336	€3.024
Total	€79.080	€7.908	€71.172
OrderPilot subscription		-€6,000	
Net annual savings			€65.172

3-Year Projection

Payback period: 9 weeks

OrderPilot pays for itself in under 2 months based on your processing volume.

From manual to automated in 90 days

A proven 3-phase implementation plan tailored to your 200 POs/month.

1

Connect DAYS 1–14

Connect OrderPilot to your ERP and email systems. Start processing your first POs automatically.

- ☐ ERP integration setup (SAP)
- ☐ Email forwarding configuration
- ☐ Initial PO template mapping
- ☐ Test batch with 10 real purchase orders
- ☐ Validation rules and exception handling

2

Process DAYS 15–45

Ramp up to full volume. AI learns your specific PO formats and supplier patterns.

- ☐ Gradual volume increase (25% → 50% → 100%)
- ☐ AI accuracy tuning on your PO formats
- ☐ Exception workflow setup with your team
- ☐ Staff training on review dashboard
- ☐ Performance monitoring and reporting

3

Scale DAYS 46–90

Full automation. Your team focuses on exceptions only. Continuous improvement kicks in.

- ☐ 100% PO volume running through OrderPilot
- ☐ Automated supplier communication
- ☐ Advanced analytics and cost tracking
- ☐ Quarterly review cadence established
- ☐ ROI measurement against this report

Most customers go live within 2 weeks. No upfront costs, no long contracts.

Methodology Note

This analysis uses industry-standard cost modeling based on your reported data: 200 POs/month, 16 minutes per PO, 10% error rate. Staff costs are benchmarked at €42/hour (operations) and €62/hour (management). Industry averages sourced from APQC, Ardent Partners, and PayStream Advisors procurement benchmarking reports. Actual results may vary based on PO complexity, supplier diversity, and ERP configuration.
