

CONFIDENTIAL REPORT

PO Processing Cost Analysis

A personalized breakdown of your purchase order processing costs, benchmarked against industry standards.

Prepared for **RB2**

29 March 2026

HIGH PRIORITY Based on 225 POs/month · 12% error rate

Your PO processing costs you

€99.846

per year · that's €37 per purchase order

DIRECT LABOR

€34.020

34% of total

PROCESSING DELAYS

€48.600

49% of total

REWORK & ESCALATION

€12.690

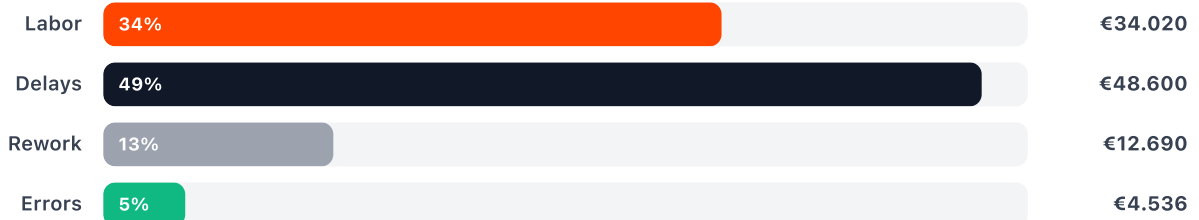

13% of total

ERROR CORRECTION

€4.536

5% of total

Cost Breakdown

Estimated annual savings with OrderPilot

€83.861

Where your money goes

1. Direct Labor Costs

€34.020

The time your staff spends manually entering, verifying, and routing purchase orders.

MONTHLY VOLUME

TIME PER PO

STAFF COST

225 POs

18 minutes

€42/hour

Calculation: 225 POs x 18 min x €42/hr x 12 months = €34.020/year

2. Processing Delays

€48.600

Lost early payment discounts and delayed fulfillment due to slow PO processing.

Payback period: 4 weeks

OrderPilot pays for itself in under 1 months based on your processing volume.

From manual to automated in 90 days

A proven 3-phase implementation plan tailored to your 225 POs/month.

1

Connect DAYS 1-14

Connect OrderPilot to your ERP and email systems. Start processing your first POs automatically.

- ☐ ERP integration setup (Business Central)
- ☐ Email forwarding configuration
- ☐ Initial PO template mapping
- ☐ Test batch with 10 real purchase orders
- ☐ Validation rules and exception handling

2

Process DAYS 15-45

Ramp up to full volume. AI learns your specific PO formats and supplier patterns.

- ☐ Gradual volume increase (25% → 50% → 100%)
- ☐ AI accuracy tuning on your PO formats
- ☐ Exception workflow setup with your team
- ☐ Staff training on review dashboard
- ☐ Performance monitoring and reporting

3

Scale DAYS 46-90

Full automation. Your team focuses on exceptions only. Continuous improvement kicks in.

- ☐ 100% PO volume running through OrderPilot
- ☐ Automated supplier communication
- ☐ Advanced analytics and cost tracking
- ☐ Quarterly review cadence established
- ☐ ROI measurement against this report

Most customers go live within 2 weeks. No upfront costs, no long contracts.

Methodology Note

This analysis uses industry-standard cost modeling based on your reported data: 225 POs/month, 18 minutes per PO, 12% error rate. Staff costs are benchmarked at €42/hour (operations) and €62/hour (management). Industry averages sourced from APQC, Ardent Partners, and PayStream Advisors procurement benchmarking reports. Actual results may vary based on PO complexity, supplier diversity, and ERP configuration.
